YEARS

GUARANTEE

Easy to use
Low maintenance

Designed for simple shaped pools
up to 10 m long,
Pool Valet Junior cleans the pool
floor thoroughly and efficiently.

Pool Valet Junior was purpose designed to clean a family pool in only 3 hours.

Filtration finesse: two sets of cassettes holding fine (fabric) and ultra-fine (paper) cartridges.

1 PVC net cartridge (large debris - beginning of the pool season) and 1 polyester fibre cartridge (ultra-fine - Dacron®).

Efficient:

Pool Valet Junior is very easy to use and does not require any installation. It is suitable for pools with simple shapes up to 10 m long.

A control algorithm allows it to adapt to any waterproofing finish to thoroughly clean the pool floor right into the corners.

Safe:

Pool Valet Junior is powered by a low voltage transformer (230 / 24 Volts), fitted with a switch with an automatic stop to guarantee user safety, as required by European standards. The automatic stop powers down the robot at the end of its cleaning cycle.

It also features safety systems to ensure its own protection in, and out of, the water.

The 'no water' safety mechanism stops the robot after a few seconds if it leaves, or is removed from, the water.

Should the robot meet an obstacle, it will either change direction or stop, if necessary.

Fast:

Pool Valet Junior was specially designed to ensure optimum cleaning of the pool floor in as short a time as possible. The Pool Valet Junior cleaning cycle was optimised as a function of the pool geometry and dimensions. This decreases wear and tear and prolongs the robot's service life.

Reliable:

Pool Valet Junior is fitted with 2 motors:

- a motor for filtration,
- a traction motor.

Pool Valet Junior robots are covered by a 2 year guarantee for all parts.

Storage stand

Power supply unit

Swivel connection on the cable

Polyester fibre filtration cartridge (ultra-fine)

PVC net filtration cartridge (large debris)

- Recommended pool length: 10 m,
- Cable length: 18 m,
- Cleaning cycle: 3 hours,
- Brushes the pool floor and corners,
- Swivel connection on the electrical cable,
- Filtration finesse: two sets of cassettes holding fine (fabric) and ultra-fine (paper) cartridges,
- Storage accessory: Storage stand,
- Duration of the guarantee: 2 years on all parts.
